Standard Bank Moving Forward™
eCommerce and mCommerce

What is eCommerce / mCommerce?
- eCommerce refers to electronic payments made in an internet and card-not-present environment
- mCommerce refers to online payments made using mobile phones and cellular technology for card-not-present transactions

How Does eCommerce / mCommerce Work?
- eCommerce and mCommerce enable merchants to accept authorised card payments for goods and services purchased online without the merchant and the customer meeting face to face
- eCommerce and mCommerce payments can be made anywhere in the world, at any time
- eCommerce payments require the customer to have an internet connection to their desktop computer, laptop, tablet or iPad
- mCommerce payments require the customer to have a data connection on their smartphone
- eCommerce and mCommerce virtual solutions enable your Business-to-Business or Business-to-Consumer operation to accept authenticated credit cards, cheque debit cards, MasterPass and Visa checkout payment transactions online

Is eCommerce / mCommerce Right for My Business?
- If you want to meet the needs of customers who want the convenience of online and mobile payments, then this is the way to go!
- If you currently operate in an eCommerce or mCommerce environment or plan to do so, our solutions enable secure, convenient and reliable payments
- You don’t need any physical device or installation to accept eCommerce or mCommerce payments – these solutions are set up online
- If you want to target a global audience in a virtual reality, eCommerce and mCommerce are suitable
- If you don’t have a physical store but want to trade online, eCommerce and mCommerce will service your needs and enable authorised card-not-present payments
